

Christopher Lawrence

Applications Engineer | Systems and Integrations | DevOps & Automation

Kansas City, MO | +1-(720)-236-7185 | chrosslaw@gmail.com | linkedin.com/in/chris-lawrence-99627554

Professional Summary

A versatile systems and software professional with a builder's mindset and high ownership, with a track record of bridging complex system architecture with practical business needs. Experienced across diverse frameworks, containerized environments, and hybrid Windows/Linux platforms, with a focus on workflow automation and reliable system integration. A collaborative problem-solver who pairs root-cause analysis with cross-functional communication, translating intricate technical challenges into actionable solutions for non-technical stakeholders. Committed to operational excellence through clean documentation, peer mentorship, and building resilient, user-focused solutions.

Technical Skills

Programming Languages & Scripting

Python, TypeScript, JavaScript, HTML5, CSS3, C#, PowerShell, Bash

Web and Modern Frameworks

React, Next.js, Node.js, Tailwind CSS, ASP.NET, Blazor, Bootstrap, jQuery

Enterprise Systems & Cloud

Active Directory, Azure AD / Entra ID, IIS, Apache HTTP Server, Apache Tomcat, Hypervisors, MSSQL, PostgreSQL

DevOps, Tools & Containers

Docker, Podman, CI/CD (Jenkins, Azure DevOps), Puppet, Git, Postman, ELK Stack, Artifactory, VS Code, Visual Studio

Core Competencies

Application Lifecycle Management, REST/SOAP API Integration, Workflow Automation, Systems Monitoring, Troubleshooting & Root Cause Analysis, AI-Assisted Development

Experience

Application Support Engineer II

Commerce Bank Jul 2023 – Present | United States, Remote

Technical Apprentice Apr 2023 – Jul 2023 via LaunchCode

- Diagnosed and resolved Puppet configuration failures and server provisioning bottlenecks, maintaining reliable CI/CD pipelines and stable server environments through disciplined Git version control.
- Managed the operational health and lifecycle stability of 30+ corporate applications across Windows and Linux servers, ensuring high availability for critical business workflows.
- Drove root-cause analysis and resolution for complex multi-tier application incidents, consistently exceeding enterprise SLA targets and preventing recurring system faults.
- Designed proactive monitoring scripts and automated maintenance workflows, directly improving application uptime and accelerating incident recovery across production systems.
- Transitioned from initial technical apprenticeship into a permanent full-time engineering role following successful delivery on enterprise application support.

Operations Technician

TierPoint Dec 2021 – Apr 2023 | Lenexa, KS

- Diagnosed and resolved critical hardware and network connectivity incidents within strict SLA windows, ensuring continuous workstation and server availability.
- Maintained and organized physical network distribution frames and patch panels, establishing systematic circuit labeling that accelerated network troubleshooting and tracing.
- Racked, cabled, and provisioned enterprise server cabinets and host hardware, establishing standardized OS configurations and network baselines for production deployment.
- Architected and administered an Apache-MySQL-PHP web dashboard, reducing the visitor sign-in time by 40%.

Education

University of the People

Associate of Science in Computer Science 2019 – 2022 / 3.72 GPA

Bachelor of Science in Computer Science 2023 – Expected 2027 / 3.78 GPA

Codecademy

Front-End Engineer Career Path Certificate 2023
